Marina Bollard

Marina Bollard (multi-functional)

The main aspect was the semen experiments and functional use when we planed this products. Although bollards work by waterfront they are safe and have a very long life period!So, the material and structure were planed accordingly!

Front view

Optional and variable contents,properties

Platform lighting

IP 65 protection
LED 50.000 operating hours (20-30 years) 2,2W capacity
Mounting Design

Powerterminal part

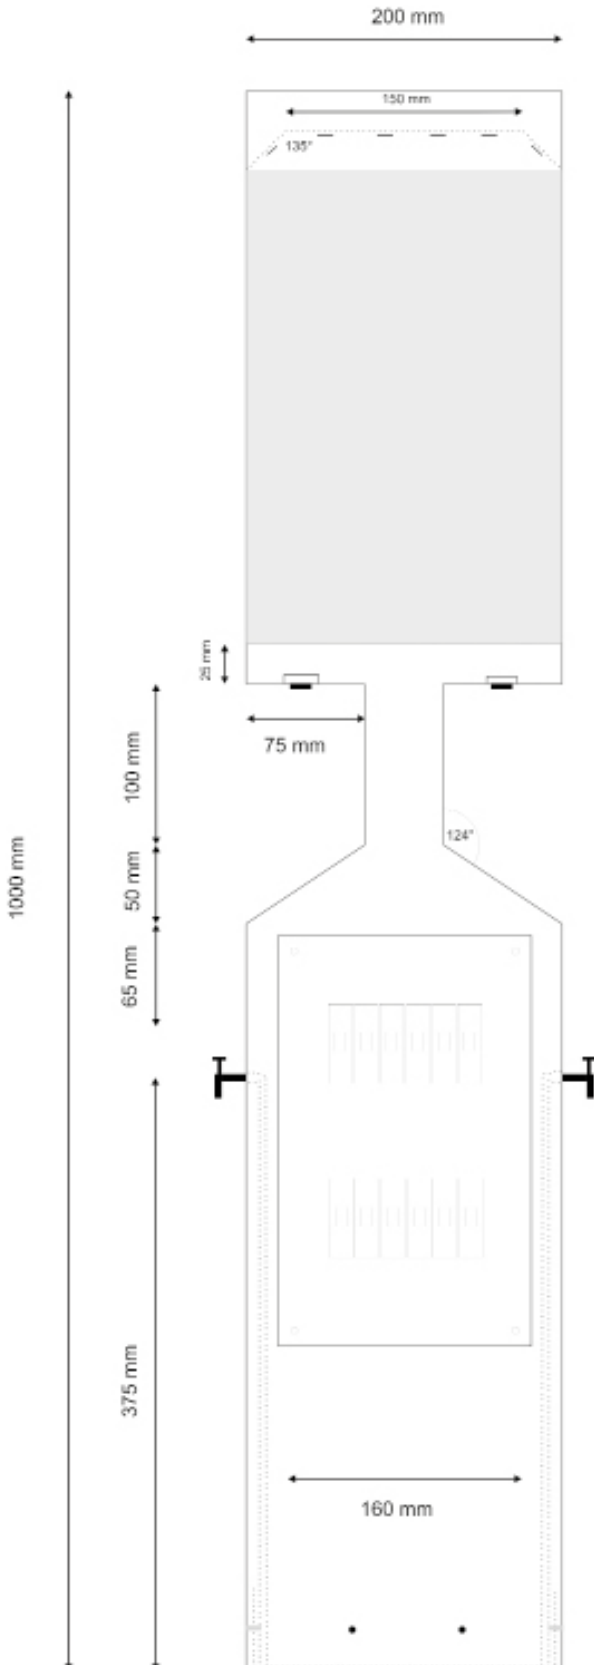

IP44 protection for power connectors and photoreceptor, with Fi relay
Easy and exchangeable mounting design

Switch and protection devices, EPH
