

A MUNICH MAGNUM line led profilsorozatunk mennyezei illetve függesztett alkalmazásra, nagy tisztaságú eloxált alumínium, RAL színben színtervezve. Belső optikája előlről eltávolítható, ez könnyű karbantartást tesz lehetővé. Használható függesztve, mennyezetre szerelve, illetve oldalfalakon is; a driverek a lámpatesten belül helyezkednek el. Elérhetőek mikroprizma és opál mikroprizma búrával.

The MUNICH MAGNUM line led profile series for surfaces/hanging applications is manufactured in high purity anodized aluminium, painted in RAL colours. Its inner tray can be removed from the front which means easy maintenance. It is suitable for hanging, surfaces and walls; drivers can be housed inside. Available with microprism and opal microprism covers.
